

# AOQILI SEAWEED DEFAT SOAP

## Clinical Experience Report

**Product name :** Seaweed Defat Soap  
**Brand name :** Aoqili  
**Place of origin :** Guangxi Wuzhou Daily-Use Chemical Co. Ltd.  
Sino-foreign Investment Ri Hua Cosmetic Co. Ltd.  
**Specification :** 150 gram/piece (round shape, skin colour)

Our hospital uses the newly formed defat soap which is provided by the Wuzhou Daily-Use Chemical Co. Ltd. and Sino-foreign Ri Hua Cosmetic Co. Ltd. to proceed the defatting and observation test with 110 examples of volunteered fat men and women. Starting from May this year, during the course of 70-90 days usage of observation, it receives better effect. From the statistics, the effectiveness of Aoqili is shown satisfactory, without side-effect, without danger, without complication, convenient usage, safety and recommending to use.

### Observation method :

With 110 examples of volunteered fat men and women in different levels to proceed the course of 70-90 days (whole course of treatment) observation. Every example insists to use continually 3 pieces of defat soap. For the serious fatness, it needs to increase the usage of the course of treatment.

Standard weight (Kg) = (height - 100) x 0.9

Weight > standard weight 50% above, as heavy fatness, need to use 2-3 courses of treatment.

Weight > standard weight 30-50%, as medium fatness, need to use 2 courses of treatment.

Weight > standard weight 20-30%, as light fatness, need to use 1 course of treatment.

Weight > standard weight 20% below, as over weight, need to use 1 course of treatment.

### Criteria on the observation of curative effect:

**Outstanding effect :** decrease the abdomen circumference over 4cm  
decrease buttock circumference over 2.5cm,  
decrease weight over 3kg.

**Effect :** decrease abdomen circumference by 1-4cm,  
decrease buttock circumference by 1-2.5cm,  
decrease weight by 1-3kg.

**Light effect** : decrease abdomen and buttock circumferences between 0.5-1cm, decrease weight between 0.5-1kg.

**Invalid** : decrease abdomen and buttock circumferences within 0.5cm, decrease weight within 0.5kg.

**Observation result:**

After usage for three months, the total effective rate of this defat soap is 91.8%. Among them, the outstanding effect is 27.3%, effect is 55.4%, light effect is 9.1% and invalid is 8.2% of the total number of people. Details as per table:

**Table of observation for 110 examples of fat people who should defat**

Treatment Time	Outstanding effect		Effect		Light effect		Invalid	
	Example	%	Example	%	Example	%	Example	%
2 months usage	27	24.5	62	56.4	11	10.0	10	9.1
3 months usage	30	27.3	61	55.4	10	9.1	9	8.2

Before usage, the total weight of 110 examples of fat people is 7,825.5kg. The average weight is 71.14kg. After three months usage, the total weight of 110 examples of fat people has been decreased to 7,577.5kg. The average weight is 68.87kg. The average weight of each example has been decreased 2.27kg.

**Conclusion:**

The defatting principle of Aoqili Seaweed Defat Soap is originated from the ancient medical classics "Compendium of Materia Medica", "Shen Nong Cao Ben Jing", "Pictorial Book of Materia Medica" and "Kai Bao Zhong Ben Cao". It combines with the latest domestic and overseas medical principles. It uses mainly seaweed and over ten kinds of extracts from natural plants and scientific methods to refine and form. It possesses the functions of laxative, reducing indigestion, stimulating blood circulation and disinfect. During bathing and with regular massage simultaneously, the defatting agents urge the extension of blood capillary and promote to digest and resolve the subcutaneous fat and protein. Besides, the defatting agents can control the excess fat from changing into storing fat. In addition, this soap can osmosis skin and stimulate the function of the intestines in order to reach the purpose of defat. Therefore, the seaweed defat soap possesses good function of defat. After usage for about 3 months time, the outstanding effective rate is 27.4%, effective rate is 55.5%, light effective rate is 9.1%, total effective rate is 91.8% and the average weight decreases 2.27kg. It can be a defatting product for the defatting

people and possesses satisfactory result. It is deeply welcome by the customers of its convenience, safety, without danger, without side effect and does not need any operations.

During the intestine hyperfunction and menstrual period, it is recommended to spread and wash only and is better to suspend all kinds of massage defatting method in order to prepare for the happening of bad effect.

16 April 1996

Gentlemen:

I am a medical researcher and journalist who reports to health professionals on products and services available to the health care community. Subsequently, I have examined the components and claims made for Aoqili, the soft soap made from seaweed and imported into the United States. The following are my observations and an opinion:

Aoqili Seaweed Defat Soap has been used by people under my supervision for purposes of testing the effects, safety, and other attributes of this product. Aoqili has been found useful for firming flabby tissues around the buttocks, thighs, and abdomen of men and women. The soap does tend to reduce the circumference of body parts when applied daily.

It has a pleasant odor and no noxious characteristics.

It leaves the skin velvety smooth and tends to remove surface blemishes. This is done without causing acute skin irritations or any erythema (redness) of the body part to which the soap is applied.

The user's blood flow tends to increase, and bowel movements improve.

Overall, testing personnel, members of my family, and myself have used Qoquili Seaweed Defat Soap and found it to live up to claims made by the importers.

Yours truly,

Dr. Morton Walker, Editorial Director
